

# Notice of Construction

## Highland Avenue Reconstruction

This work includes the replacement of the existing cast iron watermain with a new PVC watermain, replacement of the existing sanitary sewer system, replacement of the existing storm sewer system, and reconstruction of associated road works (asphalt, granular materials, concrete curb and gutter, concrete sidewalk, etc.), from Central Avenue to Crooks Street. From Central Avenue to the Niagara Boulevard, a new storm sewer will be constructed along with top coat asphalt.

### WHAT TO EXPECT:

Construction vehicles and related truck traffic is a necessary part of any construction project, so residents and businesses should expect a degree of noise, dust and short-term inconvenience.

Due to the scope of the work involved, the roadway at times may be open to local traffic only. Detours and construction and traffic signage will be adequately posted and public services such as emergency services, garbage collection and school buses have been advised of the construction works.

Driveway accessibility may be affected during construction however, every effort will be made to give you notice in advance should this occur.

At times there may be some inconvenience to you during the construction period and we respectfully request your patience and cooperation during this period.

**Construction is scheduled to start soon.**
