

Notice of Construction & Temporary Disruption to Sanitary Sewer Service

Wintemute Street Area 2018 Sanitary Sewer Rehabilitation

The work consists of sanitary sewer rehabilitation by installing a liner into the existing sewer pipe through the existing maintenance holes. This method of sewer rehabilitation will restore the pipe with minimal neighbourhood disruption, compared to conventional open trench repairs. There will be some sections of pipe, west of Central Avenue, replaced with conventional open trench construction.

Planned Schedule

Dec 11 >>> S2 – Wintemute
Dec 12 >>> S1 – Wintemute
Dec 13 >>> S3 – Wintemute
Dec 19 >>> S2 – Wintemute
Jan 10 >>> S4 – Wintemute
TBD >>> S6 – Wintemute
TBD >>> S5 – Wintemute

At times there may be some inconvenience to you during the construction period and we respectfully request your patience and cooperation during this period.

WHAT TO EXPECT:

Work equipment will be on the above noted streets until the lining activities are complete. Under certain circumstances, activities may extend into the late evening. If evening work is required, every effort will be made to minimize noise levels.

While the work is being performed, your sewer service connection will be temporarily sealed off.

In order to avoid backup of sewer water into your residence or business we ask that you take all of the following precautions to prevent water from escaping through any drain during the specified time period:

1. Do not wash clothes or dishes
2. Do not take showers or baths
3. Do not flush toilets (unless absolutely necessary)
4. Do not operate sump pumps which are connected to the sewer

If any problem occurs with your sewer service during this rehabilitation process, please either visit or contact our contractor's on-site representative:

PipeFlo Contracting Corp Operations Coordinator Braydon McNeill, 905-981-7465,
